Contents of Volume 6

NUMBER 1 FEBRUARY 1984

REVIEW PAPER: Static SIMS for Applied Surface Analysis *1*
A. BROWN AND J. C. VICKERMAN

Effects of Chemical State on Quantitative AES of Metal–Sulfur Compounds *15*
D. P. GRIFFIS AND R. W. LINTON

Effects of Elastic Photoelectron Collisions in Quantitative XPS *21*
A. JABLONSKI AND H. EBEL

Quantitative Attenuated Total Reflection (ATR) Spectroscopy of Films with an Absorption Gradient *29*
S. D. STUCHEBRYUKOV, A. A. VAVKUSHEVSKY AND V. M. RUDOY

XPS Study of Ethyl Xanthate Adsorbed onto Cuprous Sulphide *34*
J. MIELCZARSKI AND E. SUONINEN

Inelastic Electron Tunnelling Spectroscopy of Silane Coupling Agents *40*
D. M. BREWIS, J. COMYN, D. P. OXLEY, R. G. PRITCHARD, S. REYNOLDS, C. R. WERRETT AND A. J. KINLOCH

NUMBER 2 APRIL 1984

Editorial *47*

A Practical Method for Determining Backscattering Factors and Matrix Correction in Quantitative AES Analysis of Binary Alloys *48*
P. STREUBEL AND H. BERNDT

Effects of Hydrogen on ISS Analysis of Dispersed Metal Catalysts *56*
J. R. DIEHL, J. M. STENCEL, C. A. SPITLER AND L. E. MAKOVSKY

The Influence of X-Ray-Induced Auger Electrons in Quantitative Electron-Induced Auger Spectroscopy *62*
J. CAZAUX AND S. MOUTOU

Characterization of Fresh and Spent HDS Catalysts by Auger and X-ray Photoelectron Spectroscopies *68*
J. S. BRINEN, S. W. GRAHAM, J. S. HAMMOND AND D. F. PAUL

Characterization of Contamination Layers by Emission Angle Dependent XPS with a Double-Pass CMA *75*
S. HOFMANN AND J. M. SANZ

Quantification of Preferential Sputtering and Contamination Overlayer Effects in AES Sputter Profiling *78*
S. HOFMANN AND J. M. SANZ

AES Sputter Profiling and Angle Resolved XPS of *In Situ* Grown Very Thin Tantalum-Oxide Films *82*
H. J. MATHIEU AND D. LANDOLT

Short Communication
The Contribution of Bremsstrahlung to Radiation Damage by ESCA *90*
C. D. WAGNER

AES and XPS Depth Profiling Certified Reference Material *92*
C. P. HUNT, M. T. ANTHONY AND M. P. SEAH

CONTENTS OF VOLUME 6

NUMBER 3 JUNE 1984

XPS: Energy Calibration of Electron Spectrometers: 1—An Absolute, Traceable Energy Calibration and the Provision of Atomic Reference Line Energies *95*
M. T. ANTHONY AND M. P. SEAH

XPS: Energy Calibration of Electron Spectrometers: 2—Results of an Interlaboratory Comparison *107*
M. T. ANTHONY AND M. P. SEAH

Crystalline Effects in Auger Electron Spectroscopy *116*
H. E. BISHOP, B. CHORNIK, C. LEGRESSUS AND A. LEMOEL

On the Influence of Sample Temperature on Depth Resolution in Sputtering *129*
M. KÜHLEIN AND I. JÄGER

Spatially Multidimensional SIMS Analysis *132*
F. G. RÜDENAUER

Quantitative XPS Analysis Considering Elastic Scattering *140*
H. EBEL, M. F. EBEL, J. WERNISCH AND A. JABLÓNSKI

Status Report on the ASTM E-42 Committee on Surface Analysis *144*
G. C. NELSON

NUMBER 4 AUGUST 1984

Affinity of Lead for Noble Metals on Different Supports *149*
H. S. GANDHI, W. B. WILLIAMSON, E. M. LOGOTHETIS, J. TABOCK, C. PETERS, M. D. HURLEY AND M. SHELEF

A Comparative Study of SIMS Depth Profiling of Boron in Silicon *162*
J. B. CLEGG, A. E. MORGAN, H. A. M. DE GREFTE, F. SIMONDET, A. HUBER, G. BLACKMORE, M. G. DOWSETT, D. E. SYKES, C. W. MAGEE AND V. R. DELINE

Observation of Cu–Ni Alloy Surfaces by Low Wattage Glow Discharge Emission Spectrometry *167*
K. WAGATSUMA AND K. HIROKAWA

Application of X-Ray-Induced Auger Electron Spectroscopy to State Analyses of Hydrogen Implanted in Y, Zr and Nb Metals *171*
Y. BABA AND T. A. SASAKI

Comparative Study of Ion Implantation Profiles in Metals *174*
J. TAKADOUM, J. C. PIVIN, J. PONS-CORBEAU, R. BERNERON AND J. C. CHARBONNIER

Analysis of Polymer Surfaces by SIMS: 4—A Study of Some Acrylic Homo- and Co-Polymers *184*
D. BRIGGS, M. J. HEARN AND B. D. RATNER

Short Communication

Analytical Application of XPS for Surface Characterization of Coal Fly Ash and Coal *193*
K. HIROKAWA AND Y. DANZAKI

Letter to the Editor

Cross Correlation versus Convolution—A Matter of Convention: A Comment on 'The Depth Dependence of the Depth Resolution in Sputter Profiling' by H. W. Werner *196*
J. M. SANZ

CONTENTS OF VOLUME 6

NUMBER 5 OCTOBER 1984

REVIEW PAPER: The Role of Electron Spectroscopy in the Evolution of Long-Range Industrial R&D Illustrated by AES Studies in Adhesion, Catalysis and Corrosion *197*
W. J. VAN OOIJ, T. H. VISSER AND M. E. F. BIEMOND

Developing Trends in the Application of XPS in the USA *215*
C. D. WAGNER AND A. JOSHI

The Adsorption of Diethyldithiophosphate on Cuprous Sulphide *221*
J. MIELCZARSKI AND E. MINNI

Compositional Changes of ZnSe During Implantation Measured by SIMS and AES *227*
D. HABERLAND, B. KRABEL, H. NELKOWSKI AND W. SCHLAAK

Quantitative XPS: The Calibration of Spectrometer Intensity–Energy Response Functions: 1—The Establishment of Reference Procedures and Instrument Behaviour *230*
M. P. SEAH AND M. T. ANTHONY

Quantitative XPS: The Calibration of Spectrometer Intensity–Energy Response Functions: 2—Results of Interlaboratory Measurements for Commercial Instruments *242*
M. P. SEAH, M. E. JONES AND M. T. ANTHONY

Short Communication

Investigating Cyanide Electrodes by Surface Analytical Methods with Different Depths of Information *255*
M. F. EBEL, J. WERNISCH AND E. PUNGOR

NUMBER 6 DECEMBER 1984

SIMS Study of the Penetration of Metallic Secondary Impurities in Screen-Printed Silicon Solar Cells *257*
M. VAN CRAEN, L. FRISSON AND F. C. ADAMS

X-Ray Photoelectron Spectroscopic Studies of the Surface of Sputter Ion Plated Films *261*
K. S. ROBINSON AND P. M. A. SHERWOOD

AES and XPS Studies of Surface Films Deposited During the Plasma Etching of Silicon Dioxide Layers *267*
C. G. TUPPEN, R. HECKINGBOTTOM, M. GILL, C. HESLOP AND G. J. DAVIES

Study of the Fiber/Matrix Interface in a SiC Reinforced Titanium Alloy Using a High Resolution Field Emission Auger Microprobe *274*
H. J. DUDEK, L. A. LARSON AND R. BROWNING

Magnetron Sputtered Gold Contacts on *n*-GaAs *279*
A. D. BUONAQUISTI, R. J. MATSON, P. E. RUSSELL AND P. H. HOLLOWAY

Channeling Effects in Polycrystalline Copper—a Serious Impediment to Quantitative Auger Analysis? *282*
F. E. DOERN, L. KOVER AND N. S. McINTYRE

Secondary Ion Mass Spectrometric Analysis of Leaching Behaviour of Magnesium from Chrysotile in Oxalic Acid Solution *286*
J. A. VERLINDEN, J. K. DE WAELE, I. M. SWENTERS AND F. C. ADAMS

The Inelastic Mean Free Path of Electrons in Some Semiconductor Compounds and Metals *291*
A. JABLONSKI, P. MROZEK, G. GERGELY, M. MENHYÁRD AND A. SULYOK

Quantitative ISS/XPS Measurements on HDS Catalysts *295*
J. S. BRINEN, D. A. D'AVIGNON, E. A. MEYERS, P. T. DENG AND D. W. BEHNKEN
